

## Surgical Consent

Before placing your pet under anesthesia for a professional dental scaling and polishing, we will perform a full physical examination. However, many conditions, including disorders of the liver and kidneys or blood, are not detected unless blood testing is performed. For senior pets, those over 7 years of age, we recommend a more comprehensive general panel. Such tests are important before any anesthetic procedure. **For these reasons, we require, at a minimum, the pre-anesthetic panel prior to anesthesia unless, a pre-anesthetic panel, general panel, or wellness panel has been performed within the last 30 days.**

\_\_\_\_\_ Pre-anesthetic blood panel for pets less than 7 years of age  
\_\_\_\_\_ Comprehensive blood panel for pets 7 years of age and older

### Please answer the following questions:

1) Did your pet have anything to eat today? \_\_\_ YES \_\_\_ NO

If yes, please explain: \_\_\_\_\_
